Hardware Installation

Install the hard disk

✧ To install the 1st and 2nd hard disk

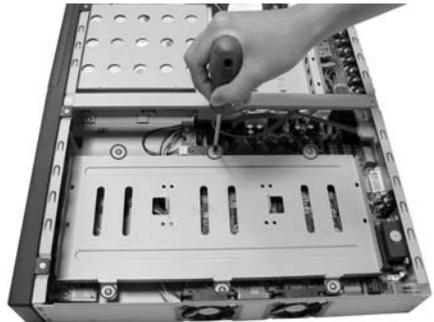

The power adaptor now only guarantees to support 2 HDD. If you require installing more than 2 HDD, please contact your local vendor to avoid unexpected damage of DVR system.

Follow the illustrated instructions below to install the hard disk:

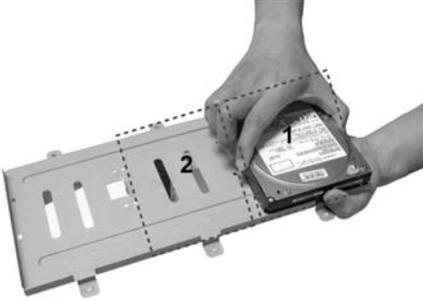

1. Loosen all screws (2 sides and back)
2. Push the cover backward and lift to open the case cover.

3. Loosen the screws of holder to make hard disk install more easily.
4. Loosen all the screws of hard disk plate.

5. The hard disk plate can be installed 2 hard disks. User can choose the position and place the hard disk on it.

6. Turn the plate and hard disk over carefully and secure the hard disk on the plate. If hard disk cannot be fit to the screw hole, then, you may adjust the hard disk position to fit the screw hole.

7. Screw tight the plate within hard disk inside the DVR unit

8. Plug the power cable into hard disk

9. Plug the SATA cable into SATA connector on the PC board

10. Plug another side of SATA cable into hard disk

11. Screw the holder

13.

12. Push the cover forward and secure the cover

14.

15. You may now connect all the cables and power on the DVR unit.

◇ To install the 3rd and 4th hard disk

Before install 3rd and 4th hard disk, please make sure to purchase the 90W power adaptor.

Please refer to the below steps to install 3rd and 4th hard disk.

1. Loosen all screws (2 sides and back)

2. Push the cover backward and lift to open the case cover.

3. Loosen the screws of holder to make hard disk install more easily.

4. Un-plug the power cables and SATA cables of 2 HDD.

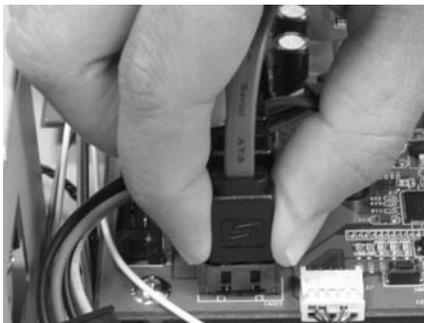

5. Loosen all the screws of hard disk plate. And then, take out the HDD plate from the DVR unit.

6. Place the 3rd hard disk on the hard disk plate.

7. Turn the plate and hard disk over carefully and screwed the hard disk on the plate. If hard disk cannot be fit to the screw hole, then, you may adjust the hard disk position to fit the screw hole.
8. Plug the SATA cable into SATA connector on the PC board

9. Plug the power cables and SATA cables into all three hard disk.
10. Screwed the plate within hard disk inside the DVR unit.

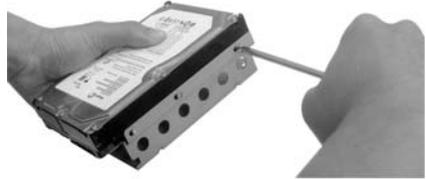

- User can leave un-plug the SATA cable of the left side HDD for screwing plate inside the DVR more easily later.
- User may manage all power cables and SATA cables for better connection.

User can adjust the step 9 and 10 for easily install process if necessary.

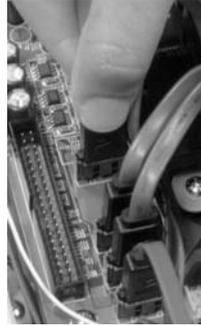

11. If user wants to install 4th HDD, then follow the steps to continue. Otherwise, go to the last two steps to complete the installation.
12. Place the 4th hard disk on the HDD holder. The head side of hard disk is same side of the screw hole of HDD holder.
13. Screwed (6 screws for both side) the hard disk on the HDD holder.

14. Un-plug the eSATA cable from SATA connector on the PC board in order to plug in the SATA cable of 4th hard disk.

15. Plug the SATA cable into STAT connector on the PC board.

16. Plug another side of SATA cable into the hard disk.

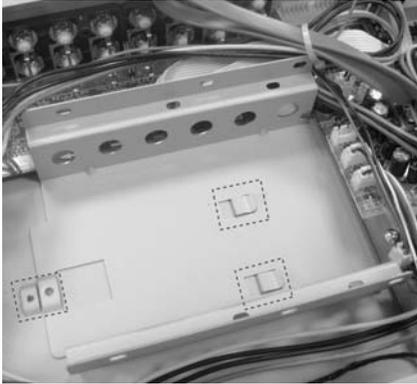

17. Plug the power cable into the hard disk.

18. Place the HDD holder inside the DVR unit. The screw hole of HDD holder is aligning with screw hole on the DVR unit.

19. Push the HDD holder forward and screw hole of HDD holder will match the screw hole on the DVR unit and HDD holder should hook on the stabled hook on the DVR unit.

User can look through the DVR from position of FAN to adjust the HDD holder position to make sure the HDD holder has hooked into stabled hook on the DVR unit.

20. Screwed the HDD holder inside the DVR unit.

21. Screwed the holder on the DVR unit.

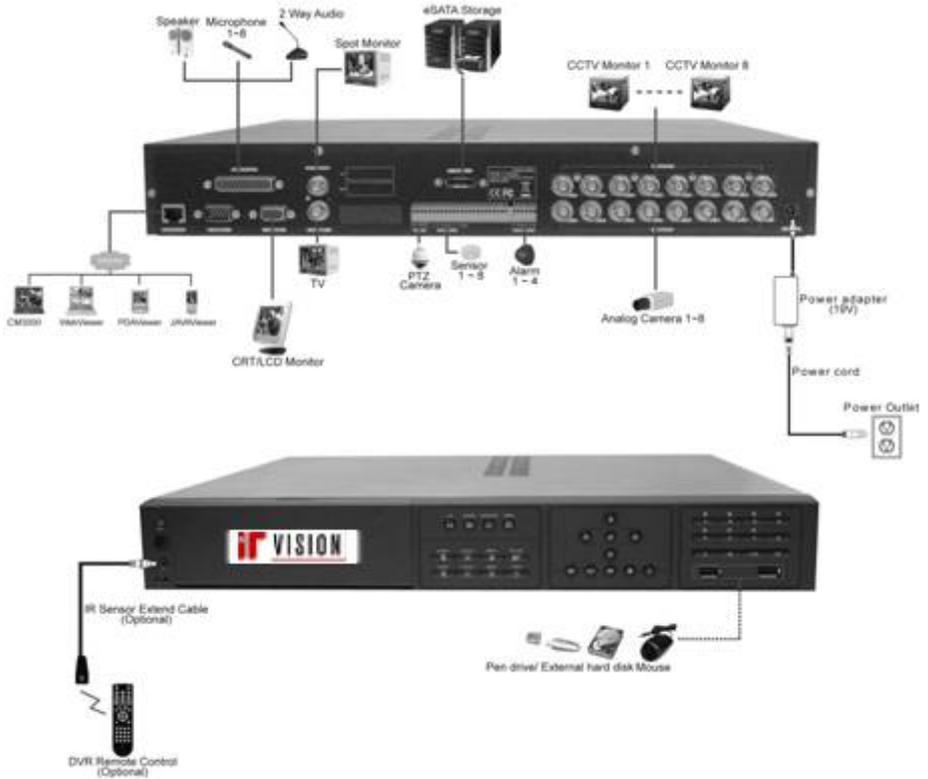

22. Push the cover forward and secure the cover

23. You may now connect all the cables and power (90W adaptor) on the DVR unit.

Device Connection

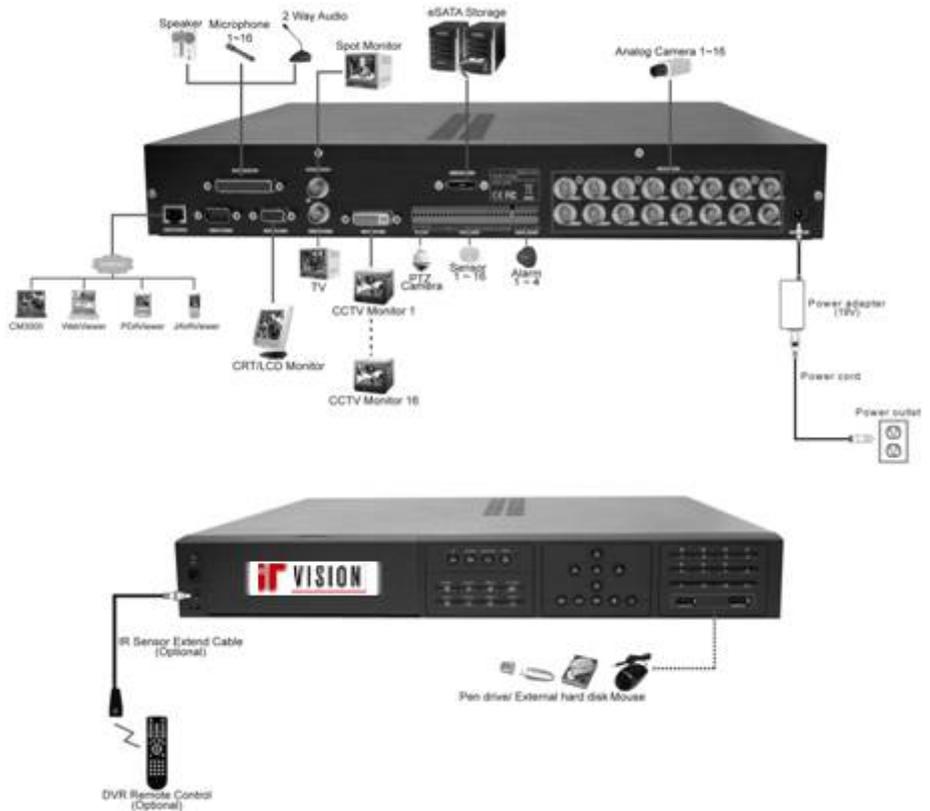

IRV PRO-AV8

-
- All connected devices have their own power supply are necessary.
 - Pen drive and external hard disk must be FAT32 format.
-

IRV PRO-AV16

-
- All connected devices have their own power supply are necessary.
 - Pen drive and external hard disk must be FAT32 format.
-

1st Use of DVR

1. Connect the cameras
2. Connect the mouse to DVR unit(through USB port on front panel)

(14) De-interlace	To enhance the video quality. Set the de-interlace mode to #1, if you are capturing motionless picture and #2, if it captures lots of movement.

Using the Remote Programs

User can use Microsoft Internet Explorer to access DVR system by entering the IP address. To use this feature, make sure that your PC and DVR server both are connected to the internet and the Network feature is enabled.

Accessing this feature for the first time you will be prompted by your browser to install WebCamX.cab, allow the installation and you should be able to connect and login afterwards. Click to **install ActiveX** if your PC required to be installed.

And then, Click **Install** when the Internet Explorer - Security Warning dialog box appears.

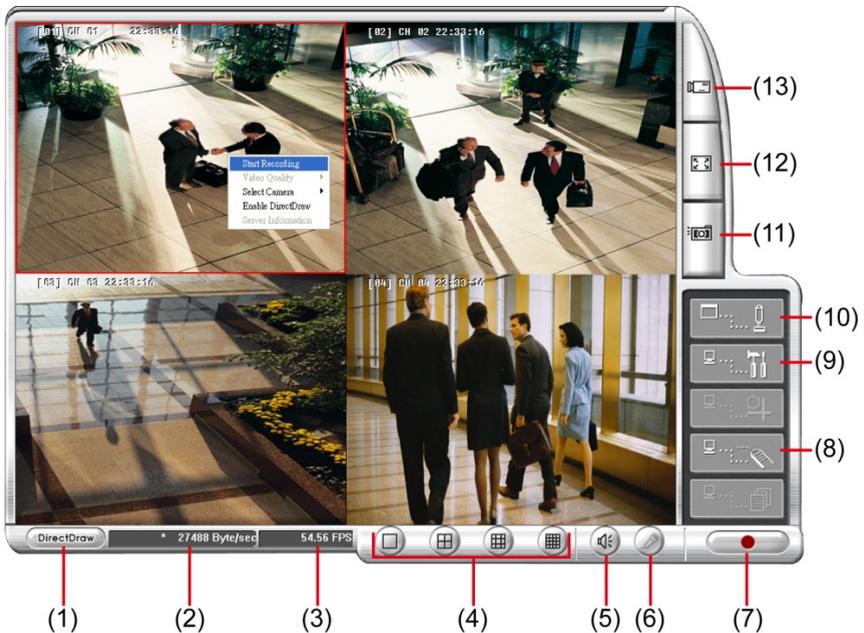

After installing the WebCamX.cab and when connecting to the DVR system, you are required to enter default account ID (Admin; capital in first letter) and password (111111) and select the type of network.

Changing account password is strongly recommended.

Familiarizing the Web Viewer Buttons

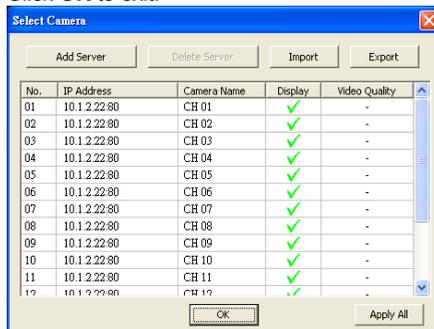

Right-clicking on the Web Viewer video screen, enables you to start video recording, change video quality, switch camera and enable/disable DirectDraw.

Name	Function
(1) DirectDraw	Enhance the video quality.
i	Not all graphic cards can support this function. If you cannot see the screen display correctly or screen is messed, please check with VGA card vendor.
(2) Received file size	Indicate the size of the data being sent per second.
(3) Camera frames	Indicate the number of frames per second.
(4) Split screen view	Select from 4 different split screen type to view the video from remote DVR server.
(5) Audio	Enable/disable remote sound.
(6) 2-way audio	Enable/disable 2-way audio function. This function allows the client and server to talk via internet using MIC. Make sure your microphone and speakers work before using this function. If the DVR server Talk to web-client setting is disabled, you won't be able to hear from the other side.
(7) Record	Start to record the video of the selected camera in AVI format. Directly click screen to select the channel that user wants to record and press Record button.

Name	Function
(8) Remote Console	Initiate Remote Console. It allows you to view the video from DVR server
(9) Remote setup	Change the DVR server settings 
(10) PTZ Control	Initiate PTZ camera controller
(11) Snapshot	Capture and save the screen shot in *.bmp format.
(12) Full screen	Use the entire area of the screen to only display the video. To return, Right-click or press ESC on the keyboard.

- (13) Select cameras to view
- Select to the view camera from different server. In Select Camera dialog box, Display column, click to enable/disable viewing the camera.
- Click **Add Server** and select the server type between DVR and IP Cam to add.
- Click **Delete Server** to delete the selected item.
- Click **Import** to load the previous saved list.
- Click **Export** to save the list.
- Click **Apply All** to change all the camera video quality based on the selected setting.
- Click **OK** to exit.

IRV PRO-AV8 series only has 8 channels will be available.
